Subject: RE: Sky Valley report received yesterday - meeting availability 11:30 AM tomorrow?

It appears my first email today did not go through either. I don't know if having all these reports is even important to you all. Please let me know if you want them and I will send them one at a time.

The main take-away is that the quarterly air and wipe sampling conducted prior to EPA issuing an approval was sufficient for us to make a determination of no unreasonable risk of harm to the known contaminants and approved abatement. Only annual wipe sampling was required after that. We have received one annual wipe sample report and results were ND.

Thank you,

Subject: RE: Sky Valley report received yesterday - meeting availability 11:30 AM tomorrow?

Hello Nancy-

I apologize, I thought the 2017 report was a summary document with all post-abatement quarterly air samples. I see now it was only the fourth and last quarter.

This is the sequence of reports. Attached to this email are reports 1-4. Report 5 will be sent in a separate email due to size limitations. Reports 6-7 were sent yesterday at 12:08 pm.

1. the Sky Valley PCB Remediation Closure Report which includes the immediate post-abatement samples.
2. Sky Valley EC- Q1 Monitoring report dated 2/1/2017 which did identify PCBs in air samples above the school indoor air ELEs
3. Fulcrum-Monroe SD ... March 2017 PCB sample event document which is a report summarizing the Q2 sampling event
4. Sky Valley OCE-009D PCB which are the lab results from the EPA inspection, samples collected 4/11/2017
5. Fulcrum-Monroe SD SVEC April 2017 Quarterly PCB Sampling Event which is a report summarizing the Q3 sampling event.
6. ATTACHED IN 3/21/19 12:08pm MESSAGE: Fulcrum-Monroe SD SVEC July 2017 Quarterly PCB Sampling Event which is a report summarizing the Q4 sampling event.
7. ATTACHED IN 3/21/19 12:08pm MESSAGE: SVEC PCB 61c 62c approval 9-15-17 which is the EPA approval where we found that all previous results demonstrated no unreasonable risk of harm to occupants (see text in 4th paragraph on page 2 for full details) and only required ongoing annual wipe sample monitoring
8. ATTACHED IN 3/21/19 12:08pm MESSAGE: Sky Valley EC – 2018 Annual PCB Wipe Sampling which is the first and currently the only annual wipe sample monitoring report (all results are ND)

Hi Michele,

Thanks for providing the Aug 2018 wipe sample results. Could you please confirm my understanding of your description today of the Sky Valley Center PCBs test results?

- 1) Air samples were collected periodically (quarterly?) during the first year post remediation, and those PCBs results were all NDs.

- 2) Wipe samples continue to be collected periodically, and all of those PCBs results (post-remediation) are also NDs. I thought I heard you say the wipe samples are collected quarterly, and if so it seems like there should be 1 or 2 additional reports between Aug 2018 and now?

Thanks. Nancy

Hello all-

Attached are the post-abatement sampling documents submitted to EPA in accordance with the EPA approval issued to Sky Valley on 9-15-2017, also attached.

Hi all, we're trying to schedule a GoTo meeting for tomorrow (Thursday) at 11:30 to discuss response to the report sent to DOH, ECY, and EPA yesterday requesting action on Sky Valley. I've attached the email. Are you available? Nancy

Thanks for organizing Nancy,

I think Nancy would be good to invite for continuity. Also the PEHSU may get called by media on this issue.

Michelle Mullin would be worth inviting, because of their role in the PCB cleanup.

ECY was also named in the letter, not sure what role they have in this scenario but they might want to participate.

Marissa Smith is their contact.

Barb

Just waiting to hear from Snohomish County. Do we want to invite PEHSU (Nancy Beaudet) and/or EPA to join the conversation? I'm off this afternoon, but will check email occasionally. Nancy

Subject: Sky Valley report received yesterday
Importance: High

Snohomish HD has asked me to set up a GoTo meeting to discuss an appropriate response to the latest report received late yesterday on Sky Valley testing. I suggested that it may take a couple of days for Barb to review the new information and that DOH management will need to decide on how to proceed. Do you think we should plan to meet on Monday? Earlier? Do you want the report forwarded to the PEHSU at this time – or wait for further discussion?
